

Solution Overview: .NET Technology Solutions

Compelling factors to choose .NET for your organization:

- Low cost solution / Lower TCO
- (Total Cost of Ownership)
- Multi-device support
- Easier deployment
- Cross language inheritance
- Memory leak, deadlock and crash protection
- Rich output caching
- Better scalability and improved performance

NET Business Drivers

The .NET framework makes it easier to combine applications, information, data sources and services across the Web using XML Web services and enable real-time information exchange.

The types of solutions that .NET addresses:

- Custom transaction processing
- Reduction in application upgrades
- Integration of enterprise applications
- Interoperability and application extensibility
- Interactions through smart devices
- Lower operation costs
- Drive sales more efficiently
- Integrate effectively with customers, partners, and vendors

The .NET common development framework enables a reduced cycle time for the implementation of new business requirements, as well as sharpens business application quality. The .NET framework also improves software developer productivity, renews systems reliability and security, and restores collaboration across functional organizations.

An Integrated Approach Creates Value

The Hitachi Consulting difference is a culmination of our focus on the strategy, people, process, and technology components of a business solution.

Strategy:

We work with you to design strategy changes, driving alignment and articulation based on project objectives and scope. We then develop and execute an approach for measuring and reporting relevant performance metrics.

People:

Our people have developed deep expertise by working with Microsoft's .NET technologies and products since their creation.

Process:

Hitachi Consulting has an established methodology that incorporates industry best practices with software engineering principles.

Technology:

Our vast solutions include .NET Server implementations, Microsoft Business Solutions and custom application development.

Solution Overview: .NET

Technology Solutions

An Integrated Solution

Let Hitachi Consulting *inspire your next success* through:

- An integrated methodology that blends industry standard SDLC (RUP) with project, change and risk management.
- An outstanding history of successful web-based custom development.
- A Hitachi Consulting .NET Framework built through several successful engagements that reduces risk and improves efficiency.
- A leadership position in the .NET arena. Hitachi Consulting representatives sit on both Rational's Unified Process Advisory Committee and Microsoft's .NET Advisory Committee.
- A premier relationship with Microsoft as a business partner and a leading implementer of its .NET technology.

Innovative Strategy

As Hitachi Consulting, we offer a unique combination of innovation and stability that comes from being a part of Hitachi, along with the agility and client focus we've always had. Hitachi Consulting's .NET solutions give companies the strategic agility they need to gain competitive advantage or to enter an entirely new market.

Let Hitachi Consulting, leveraging our .NET best-practices and frameworks, work with you to develop a .NET strategy and solution that is right for you. Together we can discover and unlock opportunities to increase revenue, decrease operating costs and efficiently collaborate with business partners.
