

Executives and Plant Managers need access to quick and accurate views of critical daily manufacturing and operational results

Executive Visibility Analytics for Chemicals

Get real-time visibility to critical action items to help improve operations and your bottom line.

Critical Business Issue

Hitachi Consulting has leveraged our extensive knowledge in the chemical industry to uncover one of the most critical business issues that many executives and plant managers deal with on a daily basis. They struggle to get the information they need – waiting days, weeks or even until the end of the month – to get the key performance metrics necessary to make informed business decisions. As a result, they find themselves making reactive decisions to problems that are no longer relevant.

If your team is sifting through spreadsheets, emails and making calls to get the data you need, we can help. Our approach lets you answer the following questions quickly and effectively:

- Did we make money on orders shipped today?
- Can we anticipate customer issues before the customer does?
- This week, what orders shipped on time with the correct quantity and quality?
- What are our top performing plants by order of profitability?
- For future orders, did our raw materials go above planned margin?
- How much down time do we have on critical equipment?

With over 15 years experience in Business Intelligence, deep expertise in Chemicals and broad knowledge connecting systems to provide visibility to executives, we have the solutions.

Hitachi Consulting and SAP BI Solution

Hitachi Consulting, in partnership with SAP, has developed an **Executive Visibility Dashboard** that allows decision makers to see and anticipate issues that are specific to the Chemicals Industry. It delivers a simple view that provides the real-time intelligence you need to improve your operations and profitability.

“ Best-in-Class companies are employing both strategic and tactical dashboard solutions in order to drive double digit improvements in profitability and have achieved substantial increases in customer service and sales performance.”

Aberdeen Group

Visibility to Key Areas in the Chemicals Industry

Three Steps toward Real-Time Visibility

Executive Visibility Analytics For Chemicals Industry

On Premise / On Demand / On Device

Step 1: Recognize the Opportunity

One of the original goals of Business Intelligence was to empower the business to think strategically and act upon the information gathered. Do you struggle with any of the roadblocks below:

- Time is mostly spent on data collection rather than data analysis
- Executives and Plant Managers asking for more and even better data
- Takes days / weeks to get a view of orders and profitability

Step 2: Call us

Executive Visibility Workshop

This session is designed to gain an understanding of your current environment and the opportunities available as well as share lessons learned and best practices. This session will focus on your business processes, KPI's you desire and expected outcomes.

Step 3: Executive Visibility Assessment

Our objective is to make getting started as simple as possible. Hitachi Consulting has a structured approach to building a BI Roadmap for Dashboarding that aligns with your company's goals and objectives. The roadmap will deliver:

- A clear Business Intelligence Dashboarding Roadmap outlining the specific plans for moving forward with gaining visibility.
- A technology requirements document outlining the tools and technology needed.
- A high-level business case supporting the need for visibility into your chemicals operation and plants.
