

Digital Innovation System

Accelerate Transformation With the Industry's Only Digital Innovation System

The internet of things (IoT) opens the door to a world of capabilities that can drive new levels of operational efficiency and success. But IoT requires a complete digital transformation of your core applications to streamline the integration and flow of data from sensors and devices throughout all layers of the business infrastructure.

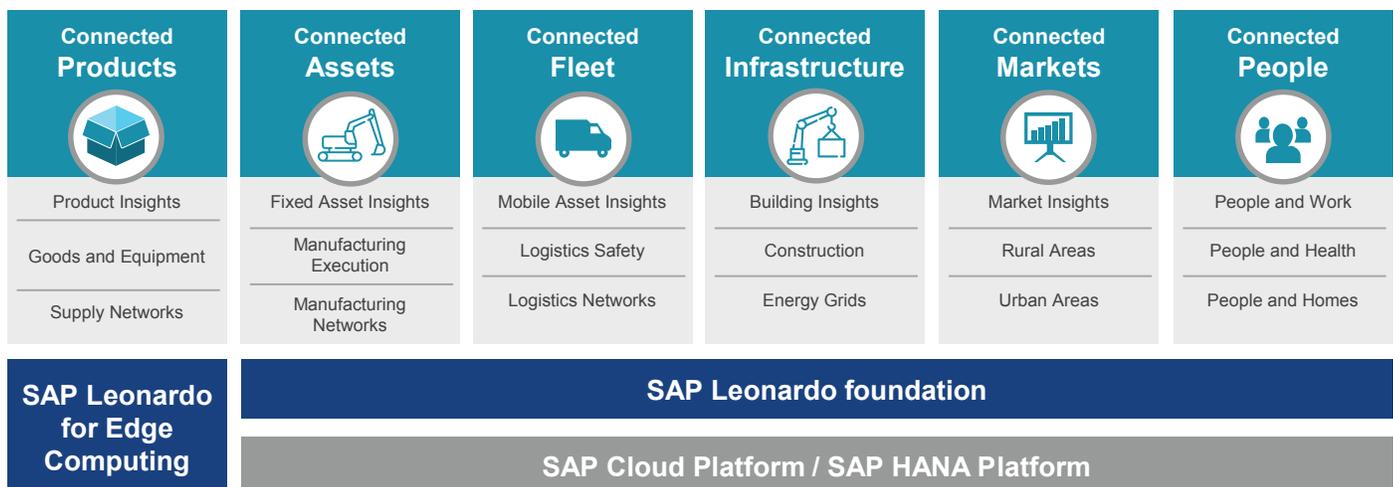

SAP Leonardo makes it easy to innovate with new technologies, integrate them into your business and scale seamlessly as your company grows. SAP Leonardo brings industry-leading capabilities, solutions, and services together to provide the industry's only Digital Innovation System. It's built to not only drive innovation as you explore

digital transformation, but also to scale that innovation and allow you to truly transform.

SAP Leonardo accelerates the time from when you recognize the need for digital transformation to having an active, working digital transformation solution by bringing together a comprehensive framework to acquire, transport, govern, store and analyze data across all applications. From sensors and devices to automation and operations control, to executive decision making, SAP Leonardo brings together machine learning, blockchain, data intelligence, big data, IoT and analytics to accelerate digital transformation.

Combining our deep industry expertise and insight into SAP Leonardo, Hitachi Consulting has the knowledge and skills to unlock new business value for clients in new and innovative ways.

SAP Leonardo Bridge

Our Approach: FastTrack to SAP Leonardo

Our Approach: FastTrack to SAP Leonardo

As a long-time SAP Global Partner, Hitachi has been a pioneer in the adoption of the SAP Leonardo Platform and has built a significant knowledge base and skills that will help you realize the value of your

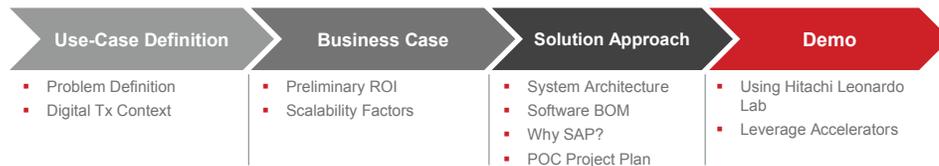

digital transformation journey and the Leonardo IoT Platform.

Our Leonardo Lab environment is operationally ready for you to leverage. We provide the guidance and expertise you need to unlock the potential of SAP Leonardo innovations for your business. This includes edge, IoT, machine learning, dashboard and workflow notifications.

By combining design-thinking methodology and SAP Leonardo technologies with industry expertise, we can help you solve high-value operational problems. Through collaborative discovery workshops with leadership, Hitachi will identify critical use cases to address. We will also design the business case and technical solution, relying on 20 years of management consulting and IoT technology experience.

Hitachi will also provision and setup the environment, deliver a prototype of the solution and provide a go-forward roadmap to take the prototype through to production that delivers operational value.

Discovery Phase

Delivery Phase (example)

When you Fast Track SAP Leonardo development with Hitachi, your organization sets the stage for immediate benefits such as:

- Boosted business performance through a digitally-enabled blueprint
- Improved capabilities and knowledge
- Increased confidence to deploy and identify financial return

Why Hitachi Consulting for SAP Leonardo

As part of Hitachi, Ltd., we bring a depth and breadth of SAP technology and innovation experience unmatched in the industry. By leveraging our position as one of the leading industrial groups in the world, Hitachi not only consults with

our clients to sell advanced technology solutions and innovations, but we also deploy and implement them to your unique specifications.

This allows us to gain invaluable experience and insights to solve complex problems that you face now and anticipate new ones that you may face in the future. With presence across key public and private sector industries, we leverage our expertise to deliver industry-centric solutions.

Learn how Hitachi's unique and innovative Fast Track to Leonardo Program helps you accelerate your digital transformation journey. For details contact: Fasttrack2Leonardo@hitachiconsulting.com
